Global
Technology
Fund

Direct Connection

bluebox

This is a marketing communication. Please refer to the Prospectus and KID of the Fund for more information on general terms, risks, and fees. Investors should only invest in the Fund once they have reviewed the Prospectus and KID before making any final investment decisions.

Investment Theme—Direct Connection

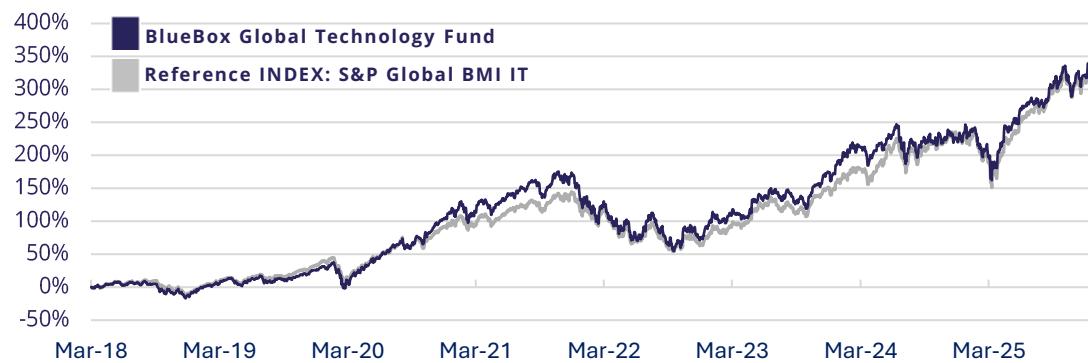

The Direct Connection of computers to the real world has enabled the technology revolution of the past 15 years, driving an acceleration in tech adoption simultaneously across all industry verticals. With every other industry investing its excess returns in technology, we expect the IT sector to continue to outperform the broader market as it steals the growth from the rest of the economy, though this is subject to regulatory and macroeconomic risks. The Fund focuses on the companies enabling Direct Connection, giving it exposure to the most exciting developments in the sector without needing to chase over-hyped themes or invest in over-valued stocks.

Fund Objective

The Fund's principal objective is to seek long term capital growth by investing globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the technology sector. The Fund is active and managed without any reference to a benchmark.

BlueBox Global Technology Fund Performance

Past performance does not predict future returns

Performance to 31 Jan. 2026	1 month	3 months	YTD	3 yr Ann	5 yr Ann	ITD Ann
BlueBox Global Technology Fund	3.5%	-0.3%	3.5%	29.1%	15.9%	20.5%
S&P Global BMI IT NTR Index	1.3%	-2.8%	1.3%	31.2%	16.6%	19.9%
12M Rolling Performance to 31 January						
BlueBox Global Technology Fund	2026	2025	2024	2023	2022	2021
S&P Global BMI IT NTR Index	28.7%	25.2%	40.4%	-16.9%	14.5%	41.9%

The fund performance is **not** measured against the benchmark. This is for information purposes only. Performance is of a USD share class, on net of fees basis, with gross income reinvested. Source: at 31/01/2026. Performance related data will display only where relevant to the share class inception date. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.

Equity Risk: The risk that investments depreciate because of stock market dynamics.

Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility. The concentration of the Fund on a given country implies the risk that the events concerning the given country may significantly and negatively affect the value of the whole portfolio of the Fund.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

Risk Indicator (PRIIPS SRI)

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

1	2	3	4	5	6	7
Lower Risk				Higher Risk		
Typically lower rewards			Typically higher rewards			

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator. A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Factors Annex'.

William de Gale's Monthly Comment

January was another positive month for the Technology sector, with the “AI Bubble” worries of November fading as data centre capex continued to grow, at least for now, with a positive start to December quarter reporting season. For nine months the received wisdom has been that amongst listed companies, the winners are those linked to building out AI capabilities (notably the semiconductor industry), while the losers will be cloud software vendors. The BlueBox Global Technology Fund has exposure to both groups, and for January the winners continued to outweigh the perceived losers, with the fund up 3.5%, ahead of our benchmark up 1.3%.

The “bottleneck-of-the-moment” for AI capex is currently a severe shortage of semiconductor memory. In particular, the high-bandwidth memory (HBM) required in huge volumes for generative AI is much more capacity-intensive to produce than other DRAM, squeezing volumes for the rest of the memory market. This is making life difficult for buyers of memory such as smartphone makers, who are facing constrained supply and a spike in costs. It is also leading to a surge in semiconductor capital equipment orders, as memory makers rush to add capacity. As a result, the fund’s top four performers in January were all semiconductor equipment suppliers: ASM International (+39%), Lam Research (+36%), ASML Holding (+34%) and Applied Materials (+25%).

On the other side, our biggest laggards were all software names: Intuit (-25%), ServiceNow (-24%), Salesforce (-20%), Palantir (-18%) and Adobe (-16%). It now appears to be accepted wisdom that

cloud software companies are going to lose out as a result of generative AI, suffering cuts to the number of seats that customers will pay for, as AI efficiencies allow headcount reductions, and pressuring pricing as GenAI breaks down barriers to competition for the established cloud players. At present there is very little evidence for this in company results, and one can just as easily make the counter argument that these big players will in the end be the ones to first monetise GenAI at scale; but it is hard to prove a negative, and the risk to the cloud companies is clearly higher than in recent years, which is why we reduced our long-term target weights more than a year ago. However, we continue to top these positions back up to those target weights on weakness, while waiting for evidence either way.

Investors must remember, despite the endless AI chatter, that most of the technology industry is not generative AI. The rest of tech is out of the limelight and starved of resources currently being diverted to massive AI investment, but disruption nevertheless continues in every industry and in many different forms. AI spend may wax and wane, but technology will remain the battleground for all those other industries, with technology enablers continuing to steal almost all the profit growth from the rest of the market, as they have done since 2007*. These very profitable enablers therefore remain the main engine of earnings growth globally, giving BlueBox investors exposure to the strongest technology trends, without the absurd valuations and poor business models of many of the high-profile, but profitless, disrupters.

Morningstar Overall Rating™

Among 1,381 Technology Equity funds. The Fund's risk adjusted returns based on Class S USD Accumulating had 3 stars for 3 years and 4 stars for 5 years of 1,381 and 928 Technology Equity Funds, respectively, for the period ended 30/11/2025.

Morningstar Sustainability Rating™

The BlueBox Global Technology Fund is rated out of 1400 Technology Equity funds as of 30/11/2025. Based on 100% of eligible corporate AUM. Data is based on long positions only.

The charges are the fees the Fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Important Information

SFDR Disclosure

The BlueBox Global Technology Fund is classified as an Article 8 fund under SFDR, promoting social characteristics by investing in technology companies that drive innovation, efficiency, and resilience. The fund applies ESG integration, exclusions, and screening as binding elements of its investment strategy to ensure alignment with these characteristics.

For further details, please refer to the prospectus and www.blueboxfunds.com/technology-fund#documents.

Information about the risk involved in the fund, including Risk Category, Equity Risk, and Market Risk can be found within the Prospectus of BlueBox Funds, in the 'Risk Factors Annex'. The base currency of the fund is USD, therefore returns on non-USD share classes will be affected by exchange rate movement. Fees and charges will reduce the return on your investment and will be affected by exchange rate fluctuations for USD against EUR, GBP and CHF. The Prospectus and the appropriate KID / KIID for the share class should be consulted to obtain further details on risk, fees, and general terms before making any final investment decisions, which should take into account all the characteristics or objectives of the Fund as described. The Prospectus and KIDs / KIIDs, as well as the latest annual and semi-annual reports, can be found at www.blueboxfunds.com, in English and, for each country where the Fund is registered, the KID in the relevant official language(s), or obtained free of charge from Carne Global Fund Managers (Luxembourg) S.A., 3 Rue Jean Piret, 2350 Gasperich, Luxembourg, and from all distributors.

As a UCITS fund, investors are investing in shares of the fund, not in the underlying assets in which the fund invests.

Carne Global Fund Managers (Luxembourg) S.A. may decide to terminate the arrangements made for the marketing of the Fund in all or a particular country. A summary of the investors' rights is available in English at <https://www.carnegroup.com/policies/>.

The representative in Switzerland is REYL & Cie Ltd, Rue du Rhône 4, CH-1204 Geneva. The prospectus, the Key Information Document, the articles of association as well as the annual and semi-annual reports may be obtained free of charge from the representative. Current share prices are available on www.fundinfo.com. The paying agent in Switzerland is REYL & Cie Ltd, Rue du Rhône 4, CH-1204 Geneva.

The Morningstar Rating TM for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. BlueBox Global Technology Fund was rated against the following numbers of Technology Equity funds over the following time periods: 1,007 funds in the last three years, 613 funds in the last five years. Past performance is no guarantee of future results.

The Morningstar® Sustainability Rating TM is intended to measure how well the issuing companies or countries of the securities within a fund's portfolio are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. Morningstar assigns Sustainability Ratings by combining a portfolio's Corporate Sustainability Rating and Sovereign Sustainability Rating proportional to the relative weight of the (long only) corporate and sovereign positions.
