MORNINGSTAR Silver ★★★★★

MORNINGSTAR OVERALL RATING™

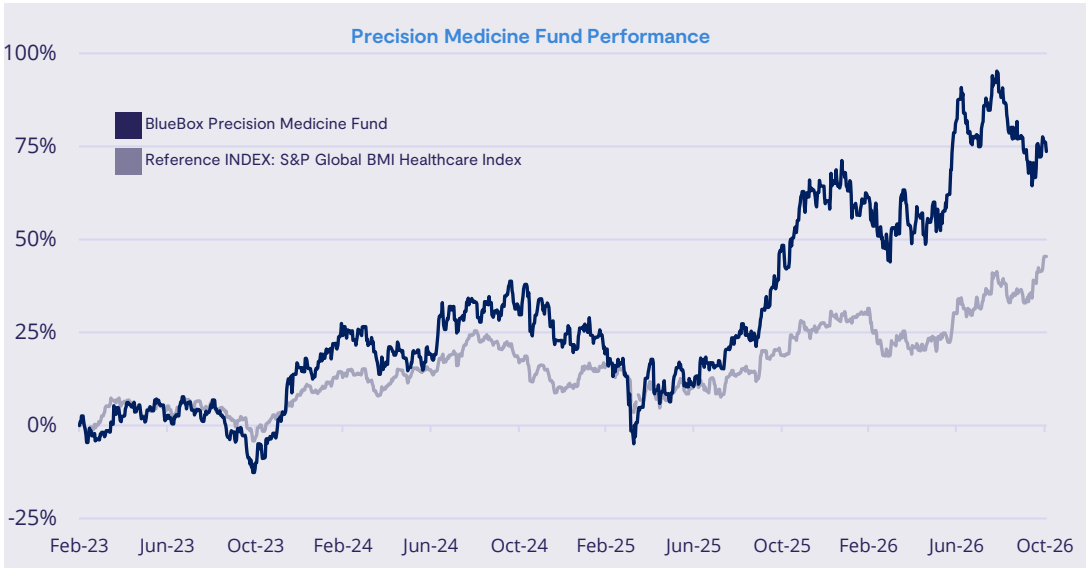

The Fund's risk adjusted returns based on Class S USD Accumulating had 5 stars for 3 years among 728 Healthcare Equity funds, for the period ended 31/08/2026..

Investment Theme - Precision Medicine

Precision Medicine is the fundamental revolution in drug discovery and patient treatment of the 21st century. Traditional medicine is being transformed into patient specific solutions that treat disease at its underlying cause. This intersection of a genomic and biotechnology revolution is changing lives, now.

Fund Objective

The main objective of the Fund is to seek long-term capital growth by investing mainly in shares of companies that have their principal business in the pharmaceuticals, biotechnology and life science sectors, or profiting from them. The Fund invests globally, is actively managed and is not benchmark constrained.

Performance to 31 Oct 2026	1 month	3 months	YTD	3 yr Ann	ITD Ann
BlueBox Precision Medicine Fund	-0.7%	0.7%	9.9%	25.1%	16.7%

1. Performance based on Share Class S since launch 28.02.2023 ISIN LU2519375591.
2. S&P Global BMI Healthcare Index is Net Total Return, calculated since launch of BBPM on 28.02.2023.
The Fund was launched under Share Class S, with Management Fee of 1%. The Share Class is closed to new investors.

The fund performance is not measured against the benchmark. This is for information purposes only. Performance is of a USD share class, on net of fees basis, with gross income reinvested. Source: at 31/10/2026. Performance related data will display only where relevant to the share class inception date. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
Equity Risk: Risk that investments depreciate because of stock market dynamics.
Market Risk: The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility. The concentration of the Fund on a given country implies the risk that the events concerning the given country may significantly and negatively affect the value of the whole portfolio of the Fund. © 2026 Morningstar, Inc. Mark Dainty's Monthly Comment

October was a round trip but with significant volatility. The BlueBox Precision Medicine fund was down over 7% by mid-month but ended nearly flat at -0.7%. That was slightly better than the S&P Select Biotechnology Index. However, the S&P BMI Healthcare Index ended up 7.7% as investors moved defensively as concerns once again appeared over AI/Technology earnings and as mega-cap pharma generally delivered a good quarter.

The precision medicine enablers focused on bioprocessing performed well (+3 to +14%) on the back of solid 3Q26 results and in the case of Lonza a well-received capital markets day. This marked a change for the group which has been met with mixed reactions after results for the last few years. Notably Danaher announced the upcoming launch of its first AI-powered autonomous lab for designing antibodies and molecular tools in early 2027, as a complement to existing scientific methods but with enhanced productivity.

In biotechnology there were positive earnings announcements from Regeneron (+22%) and Bridge Bio (+14%) while Viridian Therapeutics was +20% as expectations rise ahead of its first quarter as a commercial company.

Alnylam (-33%) disappointed again, guiding towards the low-end of the range for Amvuttra's TTR-cardiomyopathy revenue for 2026 but also experiencing some formulary and reimbursement headwinds that likely affect future growth. We reduced our target weight to around 2%. This reflects increased risk, some of which is priced in, but acknowledges that the company also has a pipeline which is not valued at all, albeit with data further out. The stock is almost back to levels last seen before the Amvuttra TTR outcomes trial read out positively in 2024 despite being in a much stronger fundamental situation.

We attended the European Society of Medical Oncology (ESMO) meeting this month which was data rich. Most importantly Tango Therapeutics released updates for its PRMT5 inhibitor in combination with Revolution Medicines' RAS inhibitors which continued to be transformational in pancreatic cancer. Tango's stock gave up its pre-ESMO rally due to concerns around the relationship between Revolution Medicines, Tango and BeOne (which has a competing PRMT5 inhibitor and the fund also owns). We believe that concern to be a little short-sighted and look forward additional updates in 2027.

We added a new starter position in Parabilis Medicines. The company had a successful IPO in the summer at $20/share, climbed above $40 by August and recently fell below $30. Parabilis has some unique technology enabling it to disrupt protein-protein interactions that have previously been undruggable. Its first in class lead candidate focuses on the WNT/beta-catenin pathway which is the underlying disease driver behind several rare cancers/pre-cancerous diseases and up to 30% of liver cancer. While the stock fairly prices success in the small indication of desmoid tumours which has excellent data, we think there is considerable upside in other, larger areas. The early-stage pipeline behind is also intriguing. Management & the capital position are both strong.

As we suggested last month, we are using pockets of weakness to look at entering high quality stocks, Parabilis is the first example of this. We think much of the technical weakness driven by de-leveraging of hedge funds is behind the biotech sector, clearing the way for a re-focus on fundamentals into year-end and 2027, assuming no major macro disruption.

The advancement of Precision Medicines continues apace, and we see no shortage of innovation or growth ahead which we believe the fund is poised to capture for BlueBox investors over time.

Share Class Charges

The charges are the fees the Fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund. Fund charges will be incurred win multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

OCTOBER 2026

THIS IS A MARKETING COMMUNICATION

RISK INDICATOR (PRIIPS SRI)

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

RISK INDICATOR (PRIIPS SRI)

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies.

This risk is not considered in the indicator. A complete description of risk factors is set out in the Prospectus in the section entitled 'Risk Factors Annex'.

Important Information

SFDR Disclosure

The BlueBox Precision Medicine Fund is classified as an Article 8 fund under SFDR, promoting social characteristics by investing primarily in companies within the biotechnology and life sciences sector whose products and services increase the health and well-being of humankind. The fund applies ESG integration, exclusions, and screening as binding elements of its investment strategy to ensure alignment with these characteristics.
For further details, please refer to the prospectus and www.blueboxfunds.com/precision-medicine#documents.

Other Disclosure

This is a marketing communication and is for information purposes only, and must not be distributed, published, reproduced or disclosed by recipients to any other person. This communication is not intended for use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation. All information provided here is subject to change without notice.

Past performance is not an indication of current or future performance and should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. Performance shown does not take into account any commissions and costs incurred in the issue and redemption of shares. Data and graphical information herein are for information only. No separate verification has been made as to the accuracy or completeness of these data which may have been derived from third party sources. As a result, no representation or warranty, expressed or implied, is or will be made by BlueBox Funds as regards the information contained herein. Source of data: BlueBox Asset Management SA.

Information about the risk involved in the fund, including Risk Category, Equity Risk, and Market Risk can be found within the Prospectus of BlueBox Funds, in the 'Risk Factors Annex'. The base currency of the fund is USD, therefore returns on non-USD share classes will be affected by exchange rate movement. Fees and charges will reduce the return on your investment and will be affected by exchange rate fluctuations for USD against EUR, GBP and CHF. The Prospectus and the appropriate KID / KIID for the share class should be consulted to obtain further details on risk, fees, and general terms before making any final investment decisions, which should take into account all the characteristics or objectives of the Fund as described. The Prospectus and KIDs / KIIDs, as well as the latest annual and semi-annual reports, can be found at www.blueboxfunds.com, in English and, for each country where the Fund is registered, the KID in the relevant official language(s), or obtained free of charge from Carne Global Fund Managers (Luxembourg) S.A., 3 Rue Jean Piret, 2350 Gasperich, Luxembourg, and from all distributors.

As a UCITS fund, investors are investing in shares of the fund, not in the underlying assets in which the fund invests.

Carne Global Fund Managers (Luxembourg) S.A. may decide to terminate the arrangements made for the marketing of the Fund in all or a particular country. A summary of the investors' rights is available in English at https://www.carnegroup.com/policies/.

The Morningstar Rating TM for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Past performance is no guarantee of future results.
